

# Got an **idea?** *We build it* **end-to-end.**

Execution-first acceleration for hardware & Software innovation — from napkin sketch to pilot manufacturing, under one roof, with a single accountable team.

IOT / ROBOTICS / MEDTECH / INDUSTRIAL SYSTEMS

01

## Ideate

Feasibility & architecture

02

## Prototype

In-house PCBA & 3D printing

03

## Test

Pre-compliance & validation

04

## Manufacture

Pilot · 10–1,000 units

TOGETHER WE BRING YOUR IDEAS TO LIFE

## One accountable platform. *Four pods.* Zero handoffs.

### 01 DESIGN & ENGINEERING POD

#### Mechanical, electronics & firmware as one team.

We integrate mechanical, electronics, embedded and software design into one workflow — feasibility to working prototype, with no vendor handoffs and no rework loops.

MECHANICAL PCBA FIRMWARE EMBEDDED DFM  
INDUSTRIAL DESIGN

### 02 PROTOTYPE & TEST POD

#### In-house iteration in days, not months.

3D printing, CNC and PCBA in-house. Pre-compliance testing and validation built into the loop — prototypes ready for real-world, not just demos.

3D PRINTING CNC PCBA PRE-COMPLIANCE  
ISO 13485-READY

### 03 PILOT MANUFACTURING POD

#### From working prototype to market-ready units.

We don't stop at a prototype. Pilot runs from 10 to 1,000 units bridge the factory handoff that kills most hardware ventures.

PILOT PRODUCTION 10-1,000 UNITS  
SUPPLY CHAIN COMPLIANCE

### 04 IP & VENTURE POD

#### For the right ideas, we go beyond services.

We co-develop IP, license, or take equity.

**Spin-off : Orvex Medical** — 44% equity, MedTech spin-off.

**Own Product : Harmonica** — three-phase smart energy logger, IP owned by Kabani Tech.

IP LICENSING EQUITY VENTURES SPIN-OFFS  
CO-DEVELOPMENT

**40%**

SPEED

faster cycles — 18 months → 6-8 months.

**0 %**

DE-RISKED

fewer vendor touchpoints & rework loops.

**100%**

CAPABILITY

Cross-functional engineering team on demand.
